

Concept of Al-Ghayab (الغيب)

Ghayab is what we can not see now with our eyes but it exists. Allah (ﷻ) has kept them un seen from us to test us like Jannat and Hell fire. This belief on Ghayab is the basis of Islam. Allah (ﷻ) wishes to test, how we would act on what we are told by the prophets without seeing them happening. Like seeing a fire no one would put his hand in it similarly seeing Hell no one would do bad deeds. Angels and Satan are also unseen but are present around us. We will see them all once we are in the world of Aakhira. Even we will see Allah in Jannat and this will be the biggest gift to the fortunate ones in Jannat.

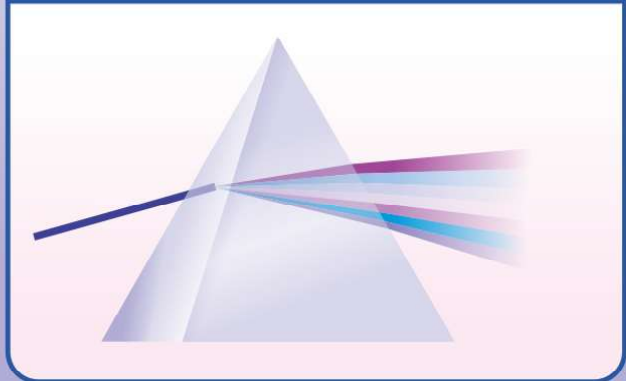

EXAMPLE

AIR IN THE ROOM

We cannot see air but can feel air and also can see light things like leaves moving because of air. So seeing a sign we know that air is present.

SEVEN COLOURS OF LIGHT

When light passes through prism it breaks into seven colors. These colors are present in light but only visible when prism is used.
