The surah of Best Creation

- Allah (ﷻ) says that He has made man the best of the best.
- He (ﷻ) gives examples of the prophets (Jesus from the land of olives and figs, Palestine; Moses from the Mount Sinai and Muhammad (ﷺ) from the city of peace, Makka) who brought guidance from Allah (ﷻ) to us. Anyone who follows this guidance becomes the best of the best.
- While man lowers himself to the lowest of the low when he denies the guidance and follows the life of his worldly desires.
- Saved are those who have faith (believe in guidance) and follow it that is they do right deeds.

PRACTICAL TIPS

Believe in the guidance given to us by our Prophet (ﷺ) and do the right deeds to become the best of Allah's (ﷻ) creations.

Levels of Creation

Level 1: The lowest level of creation comprises a physical body only with no life. Examples of this level are nonliving things like rock, wood, metals etc.

Level 2: This level is higher than level 1. It comprises a physical body and exhibits life with a mind that is the ability to interact with the surrounding intelligently and adjust accordingly. For this purpose, there are two essential acts i.e. to gain strength (food) and to reproduce. Examples of this level are the living creatures like animals and plants but not humans.

Level 3: The highest level of creation is humans. A human being comprises not only a physical body and mind exhibiting all processes of life but has an independent spiritual existence with soul. He is the only creation that has been entrusted with the choice of free will to respond to the creator's call or not. This is the level of existence that is expected to use its free will and find a way to Allah (ﷻ) among all activities of life.
